

## UB-EDGE

All-in-one Edge with integrated  
Private 5G Network

- ✓ Enabler for Industrial Automation
- ✓ AI Acceleration
- ✓ Data Privacy and Security
- ✓ Real-Time Application Platform
- ✓ Easy Deployment and Operation

Discover UB-EDGE, our all-in-one Edge with integrated Private 5G Network developed in collaboration with our partner Lanner. The local edge computing platform is ready to seamlessly run your mission-critical applications, such as real-time video analytics. Enjoy high-performance and secure wireless network access with private 5G.

Benefit from AI acceleration, enabling enhanced automation across various sectors such as industrial productions, logistic centers, constructions sites, military operations or events. Elevate your business with UB-EDGE for unparalleled connectivity and performance.

## Enhanced Automation for your Business

INDUSTRIAL  
PRODUCTIONS

LOGISTIC  
CENTERS

CONSTRUCTION  
SITES

EVENTS

## Your Key Benefits

### No need for on-site technicians!

Unified automation in the deployment and management of UB-EDGE across all technical domains allows for easy setup and hands-off operations.

### Don't worry about internet access!

UB-EDGE allows for internet access even in remote locations. Wide range of solutions is available to bridge the gap between local edge deployments and the cloud.

### You get what you need!

The flexible nature of UB-EDGE allows us to pack it with the exact features you require, saving costs and enabling your specific applications—be it more coverage, more storage, or more AI acceleration.

### Network access into the last corner of your area!

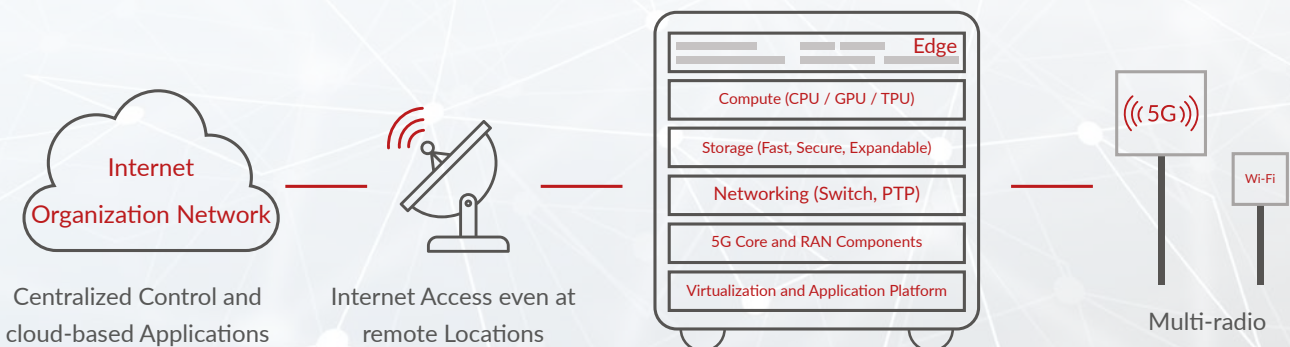

The days when certain areas were not covered or did not receive the required quality are over. UB-EDGE enables automated network planning and coverage monitoring. We've got you covered, even supporting you with your 5G frequency license.

### Your data is safe!

Storing and processing data locally on the edge increases data privacy and safety. Additionally, 5G networks are among the most secure wireless networks. The security features of UB-EDGE allow you to use secure data storage without additional effort.

## What's in the Box

Centralized Control and cloud-based Applications

Internet Access even at remote Locations

Multi-radio
